**BRANDON MAIL.**

THURSDAY, AUGUST 6, 1891.

THE REVISION.

His Honor Judge Ryan was compelled at the court of revision at Alexander to declare the Greenway Election Act a most outrageous Act, and the manner in which it has been employed in the compilation, the list for North Brandon was equally outrageous. In the first place, the Registration Clerk did not appear to know how he secured about the one-fourth of the names on the list. He had no affidavits for them, he could not say how he got them from late revised lists, nor in fact could he in many instances give the parties who honored them. The public will understand the law that allowed a list to be made up in that way is flagrantly unjust to the opposition. If it was ignorance or carelessness that prompted the Registration Clerk to make his list in that way it entitles those on the opposition that were next to insurmountable; and on the other hand if it was partisanship that influenced him in such a compilation, the law that allowed it is most dangerous in all of its important features.

For instance the general tamer of the court went to show that parties whose names it was desired to remove should be suspended, and in many cases the parties sought after were nowhere to be found. If they had been put out by affidavit properly made it was *prima facie* evidence, that they were legitimate voters and good evidence should be secured to knock them off; but the hardship lay in the fact that though the names were mythical heavy expense and substantial evidence had to be produced to knock them off. But the hardships did not end here, others were formed in the fact, who purported to be affidavits were no affidavits at all, but so many began papers filed with the clerk. In some cases parties and persons no less than government officials went through the country and got unduly qualified persons to fill up and sign the affidavits and J. P.'s to go through the form of signing and completing them in the absence of the intended voters as though they were present with the ball in their hands. Fraud of this character had to be fought the same as the frauds were genuine.

In other instances again we found affidavits completed by the Hon. Mr. Sifton himself setting forth the parties were 21 years of age, when they subsequently swore in court they were not 21 at the and would not have signed the affidavits had they known their contents thus leaving the honorable gentleman in an awkward fix and inducing the subjects to commit perjury.

The most iniquitous features lie in the fact they have absolute power in the hands of unprincipled or partisan Registration clerks. If the set called for affidavits in all cases one side would have the advantage as the other, but as it is the opposition virtually has no chance for its life as all the labor and expense of the other side is *done away with*. We very much mistake the temper of the electors of North Brandon, if they are proposed to condone the exposures at the revisions in this constituency—they have exposed a rottenness and corruption that no respectable community can endure.

We have already in our possession as *surance a wholesale purchase* of North Brandon intended by the friends of Mr. Sifton as well as by Mr. Sifton himself. Chastled mortgages on affects are freely taken, money and other considerations are offered and every device is being employed to secure by strategy what can not be secured by an uninfused expression of the electorate. It may not be the best morality for us to recommend, but none the best extreme courses are justifiable in extreme cases. We have to assume all voting is by ballot, and there are no means of tracing the ballot to the man who marks it. Under the circumstances they can take all the money they can get from Mr. Sifton and his friends and vote as their conscience and political leaning dictate. All electors will please bear this in mind on Saturday when they go to mark their ballots.

## Distinguished Travellers.

BARON AND BARONESS CAMPBELL PASS THROUGH THE CITY EN ROUTE TO GERMANY.

Baron and Baroness Campbell were passengers through the Vancouver last Monday, where they last week on the steamer of India from the Orient. They plan in the east for some time to visit the mountains of the Far East. Baron Campbell is a very Duke of Saxony, young Gothic, and regiment is the Seventh Prussian Hussars. The Baron distinguished himself for bravery in the German Army by capturing a color during the Franco-Prussian war.

**MRS. MILLION'S RIDE.**  
When Mrs. Million goes to ride she travels forth in state.

Her horses, full of fire and pride, go prancing from the gate;

But all the beauties of the day she views with languid eye;

Her head is decked with roses wades away, her voice is but a sigh.

For Mrs. Million is in an advanced stage of starch, and all the luxuries that can buy fail to give her comfort. She envies her new wife, who need not wait for a visit from that young woman to breath and blooming health. Now if some true and disinterested friend could advise Mrs. Million of the wonderful merits of Dr. Sage's Cather Remedy, she would learn that her case is not past help. She can be easily effected by the manufacturer for a dose of starch in the head which they cause a cure.

## Uncle Sam's Fish Display.

The World's Fair will have the Greatest Aquarium ever constructed.

The fish exhibit at the World's Columbian Exposition is to be a wonderful one, and not the least interesting portion of it naturally, will be the Aquarium or Live Fish Exhibit. A circular building, 110 feet in diameter, standing one extreme of the main fisheries building, and in a great curved corridor connecting the two.

Inside the building, the circular building will be 100 feet in diameter, with a rotunda sixty feet in diameter, in the middle of which will be a basin or pool about twenty-six feet wide from which will arise a towering mass of rocks covered with moss and ferns. The water will be 18 inches deep, and the water of various heights will drop to the masses of reefs, rockers, and ornamental semi-aquatic plants in the basin below. This pool contains cold fishes, golden fish, trout and other fish species of the largest variety of species may be viewed.

These will be ten in number and will have a capacity of seven thousand and to twenty seven thousand gallons of water.

Passing out of the rotunda by the entrance a great corridor or gallery is reached where on one hand can be viewed the opposite sides of the series of great tanks and on the other a line of tanks containing the various species of fish.

These will be about 375 feet or over in length, and will contain the following fish: salmon, trout, cod, haddock, mackerel, herring, sardines, mussels, lobsters, shrimps, scallops, oysters, etc.

Passing through the gallery will be a
